EDUCATION

Bachelor of Applied Science - Co-op (BASc)

Sept 2023 – Present

Level 3 - Honours Computer Science

McMaster University Hamilton, Ontario

Relevant Coursework: Operating Systems | Data Structures and Algorithms | Software Testing | Networks and Security

TECHNICAL SKILLS

Languages & Web: JavaScript/TypeScript (ES6+), HTML5/CSS3, Python, Java, SQL, C++.

Frameworks & Libraries: React, FastAPI, Flask, Django, Spring Boot, Jinja2, ElevenLabs AI, Backboard API.

Databases & Tools: PostgreSQL (Supabase), MySQL, Google Cloud Platform (GCP), Git, Docker, REST APIs.

Technical Competencies: Fullstack Development, API Design, Agile/Scrum, User-Centered Design, SDLC.

PROJECTS

CanAfford: AI-Driven Tenant Platform *React | Google Gemini | Backboard API | LLM Pipelines* 2026

- Built a "True Cost" engine and survival-cost dashboard that synthesizes live rental, transit, and grocery data using Gemini 3 Flash and Search Grounding.
- Developed a Legal Audit Agent that parses lease documents to autonomously flag illegal clauses, improving tenant awareness of Ontario Residential Tenancies Act (RTA) violations.
- Integrated ElevenLabs Voice AI to generate accessible audio briefs of dense financial and legal audits, ensuring information transparency for a wider user base.

Architect: Codebase Scaffolding Engine *Python | Jinja2 | System Integration | CLI Development* 2026

- Developed a professional Global CLI that automates the generation of framework-agnostic architecture blueprints, reducing launch friction for developers.
- Integrated an automated server layer and a "Founder's Vault" state management system to track project history and provide a seamless co-pilot experience.
- Collaborated with a cross-functional team of three to design a strict separation of concerns between Domain, API, and UI layers within the Jinja2 rendering engine.

Silva's Media Tracker *Vanilla JS | FastAPI | Supabase | PostgreSQL* 2026

- Engineered a decoupled architecture featuring a micro-grid frontend and high-availability FastAPI backend for persistent movie and show tracking.
- Developed dynamic modeling algorithms to calculate "Passion" indices based on genre and director preferences.
- Built a Glassmorphism-styled SPA optimized for mobile micro-grids and widescreen density, integrating a high-availability Supabase PostgreSQL layer for cloud persistence.

WORK EXPERIENCE

Software Engineer Intern | *Callidora Trading Company Ltd - Guelph, ON*

May 2026 – Present

- Architecting and deploying data-driven backend services and software applications using Python and SQL to translate complex business requirements into scalable technical solutions.
- Developing BI dashboards and data visualizations (Domo/Tableau) to deliver actionable insights while documenting cloud-based workflows in GCP to ensure long-term system maintainability.
- Collaborating with cross-functional teams to bridge the gap between business needs and technical design, focusing on horizontal scalability and efficient project lifecycle management.

CERTIFICATIONS

Google Project Management | *Google (Coursera)*

May 2026

CS50x: Introduction to Computer Science | *Harvardx*

2026
